

PRESS RELEASE  
(For immediate release)

**NUVOLT CORPORATION ANNOUNCES THE SIGNING OF AN AGREEMENT TO SELL ITS AGRIVOLT NOISE FILTERS TO A LEADING SPECIALIZED LIGHTING MANUFACTURER.**

**Levis (Quebec)** July 27, 2009 Jacques Dion, President and CEO of **Nuvolt Corporation (Nuvolt)** (TSX-V: NCO) is pleased to announce today the signing of an agreement to sell its *Agrivolt Noise Filters* to **CBM Electronic Lighting Inc (CBM)**, a leading manufacturer of specialized lighting equipment in Granby, Quebec.

“The agreement between our two companies, both of which are well known in the agricultural sector, creates a good combination. Filters developed by **Nuvolt** provide the best solution for **CBM** product designers and their integration into **CBM** lighting equipment offers yet another application for *Nuvolt Solutions*.” says Mr Dion.

“With this agreement, **CBM** has rapid access to a fully developed technology while **Nuvolt** has another market for its filters. **Nuvolt** Management estimates that in the near future this agreement should translate into a significant increase in sales of both companies’ products. For **Nuvolt**, the short and mid-term objectives could amount to hundreds of thousands of dollars” says Mr. Dion.

**About CBM**

**CBM** is a major manufacturer of moisture, dust and waterproof fluorescent and sodium lighting. Its products are found in the agricultural, industrial and commercial sectors. The company distributes everywhere to Canada and exports all over the world.

**About Nuvolt**

**Nuvolt** specialises in the design and marketing of equipment monitoring systems and electrical network management for the industrial, commercial and agricultural sectors.

Its main products are the *Agrivolt System*, an electrical network management system for dairy, pig and poultry farms; *Agrivolt Filters* to control electronic noise in agricultural and commercial applications; and *RELAX* a farm equipment monitoring system.

**Nuvolt** is also engaged in the development of *SMARTSCAN*, a highly innovative monitoring system aimed at preventing electrical network failure in the industrial, commercial and agricultural sectors.
